

*Eliminate airborne contaminants
with air filtration systems from
AER Refurbished Systems*

*Spark Traps
for
Sparks, Chips and Large Particles*

Spark Traps

Contaminants:

Primary: Dust, sparks

Other:

Small metal particles, small chips, sparks

Capture Approach: Source Capture System,
on collector or in-line on existing or new ducted systems

Unit Mounting: In-line on duct system or on collector

Applications:

Grinding, deburring, cutting, welding and a variety of other applications.

General Design, Spark Traps:

Designed primarily as an accessory to source capture ducted exhaust or dust and dust/fume collection systems for grinding, deburring, cutting, welding and a variety of other applications. Typically attached to new AER Refurbished Systems collectors or, other existing collection systems designed to filter and clean contaminant laden air. AER Refurbished Systems in-line Spark Traps are designed for dry dust applications that create hot metal particles and sparks. They feature an integral hinged clean out door for easy access to cleanable spark arrestor screen. Standard color Blue.
